message

Message from the CEO

since our founding, we have been committed to research and development of proprietary products leveraging advanced functional ceramic technologies.

To pursue health for both “mind” and “body,” we have set our mission as follows: to create health and happiness through our products and services, and to enable a richer, more comfortable lifestyle. Guided by this mission, we continue striving to enhance the quality and richness of everyday life for people everywhere.

Even in an era of accelerating change in society, values, and markets, we aim to be a company that continues to take on challenges without fear and to grow steadily.

Looking ahead, we will work toward realizing the Action Plan 2030, established in 2025, by further strengthening our internal structure and capabilities. As we continue to expand what is possible, we will keep evolving as a value-creating company—one that pursues health for both mind and body, even in the new era.

Make everyday life more comfortable.

We develop and deliver a diverse portfolio of businesses that support health and a comfortable lifestyle.

OAZO leverages its functional ceramic technology to develop and provide Artificial Hot Spring (Onsen-style) Systems, water purifiers, and radon-related products. From solutions for businesses to products for the home, we support the health and well-being of both mind and body across a wide range of settings—delivering peace of mind and comfort to everyday life.

Corporate Philosophy

Our Belief

For a healthier “today” and “tomorrow”—for mind and body.

Mission

Our Mission

Through our products and services, we create health and happiness—enabling a richer, more comfortable lifestyle.

Vision

Our Vision

By pursuing health, we aim to create a future where everyone can live richly and fully—both physically and mentally.

Values

Guiding Principles & Values

1 Innovation

We lead the health and wellness industry through continuously new ideas and technologies.

2 Trust & Quality

We provide safe, reliable products and services.

3 Sustainability

We promote health and wellness with consideration for the environment and society.

4 Challenge & Growth

We embrace change and continue to challenge ourselves to create a better future.

RELAQUA® Artificial Hot Spring System Business

From commercial facilities to homes, we offer Artificial Hot Spring Systems that meet a wide range of needs.

Artificial Hot Spring RELAQUA®

Installed at 100+ locations across Japan.

We manufacture and sell commercial Artificial Hot Spring Systems for a wide range of facilities, including accommodation, nursing-care facilities, and sports clubs.

S Type
System type equipped with a filtration unit.

T Type
For facility renovations and existing baths.

D Type
Simply place it in the bathtub to create an artificial hot spring.

O Type
One-pass method enables installation on a room-by-room basis.

Artificial Hot Spring for Mist Sauna RELAQUA® Radon Mist

A new concept: Radon Mist Sauna!

By generating radon—a component associated with hot springs—our Radon Mist Sauna helps enhance facility value and differentiation.

Onsen at Home RELAQUA®

Available for homes across Japan.

Enjoy an onsen-like bathing experience at home with our residential Artificial Hot Spring System featuring built-in filtration. Bring the joy of hot springs into everyday life.

After-Sales Service & Maintenance

To ensure you can use our products safely and with peace of mind for years to come, we also provide after-sales service and maintenance. Please feel free to rely on us for ongoing support.

Ceramics / OEM / ODM

With a wide range of ceramic materials, we respond to your needs and requirements.

■ Ceramics

We propose ceramic materials tailored to your needs. We provide end-to-end support—from manufacturing to wholesale distribution.

99% bacteria removal rate!
Great-tasting water supports your health every day.

High-Performance Water Purifier

RELAQUA®
WATER

■ High-Performance Water Purifier

■ Countertop Water Purifier

■ Compact Water Purifier

PFAS-Removal Models Available

What is an Artificial Hot Spring?

Natural hot springs are created when water emerges after passing through mineral-rich rocks and geological layers underground. OAZO's Artificial Hot Spring System recreates this natural mechanism using the power of ceramics and minerals—without mining or excavation. With our proprietary Radon Ceramic, benefits such as supporting metabolism and easing discomfort are expected.

Drone Services

We provide aerial filming services and drone implementation/training programs. Based on extensive flight experience across a wide range of scenarios, we propose safe and reliable flight plans.
